Harajuku and Tennozu Isle

Harajuku

Begin your day with a visit to one of Harajuku's most exciting contemporary galleries: *Nanzuka Underground*.

Now in its own dedicated flagship building, Nanzuka Underground utilizes its expansive space in the backstreets of Urahara to showcase previously overlooked post 20th century Japanese artists, such as pop-artist *Keiichi Tanaami* and painter *Harumi Yamaguchi*.

Tennozu Isle

Located alongside the canal, *Tomio Koyama Gallery* is a venue known for being the first point of call for the introduction of new Japanese artists. This space is a foundation for Japanese contemporary art, and represents a variety of different practitioners, from ceramicists and sculptors to photographers alike.

While in Tennozu, also check out the myriad artists and artworks displayed at the Terrada Art Complex, the largest-scale gallery complex in Japan. Featuring the concrete sanctum of *Anomaly*, a three-in-one space, to the dynamic exhibition space *Scai Park*, the distinct atmosphere of these diverse spaces provides an immersive, varied experience for visitors.
